

Analytics Engagement + Information Sharing Sessions

BUILDING CAPACITY

USING DATA + EVIDENCE

IMPROVING STUDENT SUCCESS

THE SESSIONS

The Ministry of Education and Child Care invites B.C. public school district staff to join our monthly, virtual 50-minute Analytics Engagement and Information Sharing sessions to learn about new and existing analytical products offered by the Ministry for capturing and analyzing data. Topics range from student enrolment and demographics to experiences and outcomes.

The goal is to build district capacity in using data and evidence. To help do this, districts can provide comments and ask questions about the Ministry's analytical tools. Additionally, districts are encouraged to share how they are using their local and Ministry-provided data to improve student success.

HOW IT WORKS

Superintendents will receive an invitation to each session via the Deputy Minister's Bulletin and are encouraged to attend these sessions and invite staff as they deem appropriate. Attendees are asked to review the report for each session in advance and come ready with comments and questions.

September

Welcome to the new school year, and overview of the Student Learning Survey (SLS).

October

Reporting SharePoint for school districts. Engagement – *how can the sessions help school districts improve student success?*

November

Student Success website review and Enrolment Statistics and Completion Rate

December

No session (*Happy New Year*).
